Lawn Workshop Scheduled

With September around the corner, now is the time to start thinking about cool season grass lawn renovation or establishment. The fall season for lawn management is marked by Labor Day weekend. This is usually a good time to do some work on your lawn. With this in mind, University of Missouri Extension will host a workshop on Thursday, September 3rd at the Cape Girardeau County Extension Center located at 684 W. Jackson Trail in Jackson, MO. The workshop will start at 6 pm and conclude by 8 pm. The workshop will provide information on renovating or establishing a cool season grass lawn. It will also be an opportunity to ask questions about general lawn management for the upcoming winter and spring. The workshop cost is $5 to cover cost of materials. Please call the extension office at (573) 243-3581 to register by September 2nd. Workshop is subject to cancellation without notice if no one registers.
