

UNIVERSITY OF MISSOURI

Indoor Air Quality and Health Protection Seminar

Thursday, Oct. 6, 2016, 6:30-8:30 p.m.

Laclede County Extension Center
186D N Adams Ave., Lebanon, MO

Closing up your home as the weather turns colder can concentrate pollutants that can be harmful to your health. This seminar will explain about pollutants like mold, dust mites, radon, and asthma “triggers”, and you’ll learn no-cost/low-cost ways to reduce or eliminate these problems.

The seminar will be led by Bob Schultheis, natural resource engineering specialist with University of Missouri Extension.

A fee of \$10 per person will help cover seminar expenses. Pre-registration is required by Monday, Oct. 3 to plan for resource materials. For more information or questions, contact the Laclede County Extension Center at 417-532-7126, or send email to lacledeco@missouri.edu

University of Missouri Extension is your unbiased source
for research-based advice and educational programs.
