

## Private Pesticide Applicator Training Dates Set

Agricultural commodity producers who need to obtain or renew a private pesticide applicator license can attend one of the following training sessions provided through University of Missouri Extension. This class also completes the EPA worker protection training program for agricultural employees who handle pesticides. This class does not complete the requirement for either commercial applicators or applicators using synthetic auxin (Dicamba) herbicides. University of Missouri Extension Pesticide Applicator (PAT) programs are open to everyone but only individuals 18 years or older who produce agricultural products may receive a license.

Regional Extension Field Specialists will also provide livestock and business Ag Business updates immediately following the PAT training program.

Those unable to attend one of the group training dates may obtain or renew their license at their county Extension Center by appointment. Contact your county extension office for more information.

PAT Classes will last approximately 2 hours and are scheduled as follows:

Howard County – Jan 28 @ 1:00 and 6:00 p.m. Howard Co. Extension Office, 600 W Morrison, Fayette
