

Judging Class

Consumerism

Trade-off & Peer Pressure

This page is for the Leader

Supplies Needed:

Photos of items or real items, Situation and Option card, 4-H judging cards, Judging Scale Chart, and pencils.

Suggested Age: 8-10

Reasons:

- C** would be the best answer because Liam clearly knows what he wants. He will not let temptation or peer pressure distract him from his goal.

- D** could be an option if he cares that much about what his friends think. However, he would have to spend a lot of time working for the toy he did not really want in the first place.

- A** is not as good an option because he will be giving up the thing he wants the most.

- B** is not a good option because he could end up getting arrested and embarrassed.

Judging Class

Consumerism

Trading-off & Peer Pressure

Situation:

Liam loves to play video games. He has been saving his allowance to buy a video game that he really wants, and he has \$20. He needs \$50. He is at the toy store and sees an action figure just like his friend's. It costs \$10. He does not really want it, but his friends have been telling him he should buy it. What could he do?

Options:

- A.** He could buy the action figure and give up on saving for the video game.
- B.** He could steal the action figure so he would not have to spend his money.
- C.** He could decide not to buy the action figure and keep saving for the video game he wants more than anything.
- D.** He could ask his mom to buy it and do extra chores around the house to pay her back.
