Agronomy - Forages Project Brief

Learning Objectives
- Identify manageable sized fields with similar characteristics
- Identify nutrient status of fields
- Learn how to collect a soil sample
- Learn the appropriate time to collect a soil sample
- Interpret Soil Test Results
- Identify beneficial and non-beneficial insects in field crops
- Learn about field crop problems
- Learning to develop a successful forage system
- Selecting forage species based on yield distribution and forage quality

Ideas for Speech Topics
- The importance of soil samples
- How to develop a forage system in your region of Missouri
- Field crop problems
- How to analyze your soil samples
- Weather impacts on forages

Critical Thinking
- Thinking through forage selection
- Deciding when to fertilize
- Understanding herbicides
- Understanding forage proteins related to livestock feed

Fair Projects
- Hay judging display
- Samples of hay
- Weed identification poster
- Anatomy of grass or legume poster
- Photos of hay and production
- Photo story of your hay field
- Photo story of your corn field
- Photo story of your soybean field

Community Service
- Buck bales for a member of your community
- Spread straw for Master Gardeners
- Plant appropriate ground cover in vacant lot
- Volunteer with Conservation Department Prairie project

Demonstration Ideas
- How to use a hay probe
- How to judge hay
- How to read a hay test
- How to figure a least cost ration
- Explain different forages
- Herbicide use
- How to take a soil sample
- Explain soil samples information

Science & Technology
How have you used science and technology in this project area?
Examples:
- Formulate assumption (hypothesis)
- Calculate and measure seed volume
- Calculate and measure fertilizer needs
- Analyze soil sample

Field Trips
- Local equipment dealer
- Forage testing lab
- Farm tour
- Soil Lab
- Local herbicide/fertilizer distributor
- Local conservation department native prairie
- Extension Office - visit with Agronomist
- Extension Office - visit with Livestock Spec
- Weather station

Show Me Character
Trustworthiness - includes honesty, promise keeping and loyalty.
- Always be honest with your project leader
- If someone asks if you have taken care of your garden - weeding, hoeing and watering - tell them the truth
- It's OK to have family members help; it makes the project more fun!

Respect - includes courtesy and proper treatment of people and things.
- Pick your produce on time; don't let it stay on the vine too long
- Remember that you chose this project; you have the responsibility to grow the best product possible
- Are others counting on you? If you have promised someone produce, remember to get it to them on time and in good condition
Responsibility - includes the pursuit of excellence, accountability and perseverance.
- Respect Mother Nature
- Provide proper nourishment to the soil by applying nutrients like fertilizer
- Return produce to the earth through composting
- Understand that others may not enjoy every type of produce that you grow

Fairness - involves consistently applying rules and standards appropriately for different age groups and ability levels.
- Don't charge others unrealistically high prices for your product. Remember they are helping you by testing your vegetables and telling you what you can improve
- Learn the rules of your local fairs and farmers markets so you know what to expect when you enter and sell

Caring - promoting the well being of people and things in a young person's world. It denotes action and not just feelings.
- Share what you have grown with others
- Don't forget the birds and insects; they like to eat leftovers from your produce and can help keep your garden healthy
- Many people can benefit from your garden; think of ways to share your produce with people who may not have fresh food to eat

Citizenship - includes making the home community and county a better place to live for themselves and others.
- Grow a garden in community space to see what it's like for people who don't have their own gardens
- Be a good citizen by keeping your space neat and clean
- Don't use more than your share of the ground; remember you're not the only person or animal enjoying the earth
Share what you know about insects; help others see the benefit of having them around

Show Me Standards
Missouri 4-H members will acquire the knowledge and skills to gather, analyze and apply information and ideas, communicate effectively, recognize and solve problems, make decisions and act as responsible members of society.

4-H members will acquire a solid foundation which includes knowledge of:
- Health/Physical Education - consumer health issues (such as the effects of mass media and technologies on safety and health)
- Mathematics - addition, subtraction, multiplication and division; other number sense, including numeration and estimation; and the application of these operations and concepts in the workplace and other situations.
- Social Studies - economic concepts (including productivity and the market system) and principles (including the laws of supply and demand).
