Dogs

## Puppy Food

This page is for the Leader

### Supplies Needed:

Photos of items or real items, Situation and option card, 4-H judging cards, Judging Scale Chart, and pencils.

### Reasons:

- A** is over **D** because puppy chow has extra vitamins, minerals and easier to digest for puppies
- D** is over **B** because puppies need full calories, since they are growing so fast and use lots of energy/calories; also size and hardness of adult food can be a problem
- B** is over **C** because the food is made for dog's needs, and with reduced calorie, they would need to eat more of it to meet their needs, this usually doesn't happen
- C** is last because cat food is not good for dogs; it is not made for their bodies and nutritional needs and can even cause problems for dogs.

### Puppy Food

#### Situation:

Bryce got a new puppy. Bryce and his mom are shopping for food for the new puppy. Which of these foods would be best for him? Rank from best to worst and say why.

#### Options:

- A.** Puppy Chow
- B.** Reduced calorie dog food
- C.** Kitten food
- D.** Adult Dog Food
