

Skill-a-Thon

Goats

Giving Antibiotics

Supplies Needed

Oranges, hypodermic needle, syringe, water, paper towels, bandages (just in case)

Situation

Your goat is sick. Your veterinarian has given you antibiotics that you are to give to the goat by injection each day.

Task

Give a proper injection to the orange.

Directions

Take the cap off the needle. Fill the syringe with 2 cc water. Give the injection to the orange, making sure all the water is injected. Remove the needle and replace cap.

Remember: be very careful with the needle it is very sharp.
