**\$5,221,393**

**September 15, 2018 – August 31, 2023**

**OIA-1810732**

**Co-funded by the  
Office of Integrative  
Activities (OIA) and  
the following  
Directorates:**

-  **Biological Sciences (BIO),**
-  **Computer and Information Science and Engineering (CISE),**
-  **Education and Human Resources (EHR),**
-  **Engineering (ENG),**
-  **Geosciences (GEO),**
-  **Mathematical and Physical Sciences (MPS),**
-  **and Social, Behavioral, and Economic Sciences (SBE).**

**Oludurotimi Adetunji**  
Brown University

**Jennifer Fields**  
University of Arizona

**Megan Heitmann**  
Iowa State University

**Amy Pratt**  
Northwestern University

**Susan Renoe**  
University of Missouri

**Julie Risien**  
Oregon State University

**Michael Jacobson**  
Binghamton University

**Paula Jasinki**  
Green Fin Studio

**Matt Johnson**  
Penn State University

**Diane Rover**  
Iowa State University

**Natalie Shaheen**  
Illinois State University

**Thomas Tubon**  
Madison College

**Kemi Jona**  
Northeastern University

**Janice McDonnell**  
Rutgers University

**Kevin Niemi**  
UW-Madison

**Laurie Van Egeren**  
Michigan State University

**Sara Vassmer**  
University of Missouri

**Jory Weintraub**  
Duke University

# Council of Experts

Jamie Bell  
CAISE

Rena Cotsones  
Northern Illinois University

Lindsay Currie  
Council on Undergraduate  
Research

David Phipps  
York University  
(Canada)

Douglas Randall  
University of Missouri

John Saltmarsh  
Brown University

Corey Garza  
CSU-Monterey Bay

Deborah Hanuscin  
Western Washington  
University

Eric Marshall  
Kavli Foundation

Toby Smith  
AAU

Leonie van Drooge  
Rathenau Institute  
(Netherlands)

Beronda Montgomery  
Michigan State University

Craig Ogilvie  
Montana State University

Aditi Pai  
Spelman College

## What does ARIS do?

---

- Cultivate a **community of researchers and professionals** dedicated to advancing research impacts
- Provide **resources** to help that community demonstrate the impact of research in society
- Deliver **training** to build capacity with scientists and institutions to advance research impact
- Develop **partnerships** to broaden impact and the community working together to connect research and society
- Advance **scholarship** and the use of evidence in research impact practices

## ARIS Community Facts

Committed to elevating practice and use of evidence in practice, identified that curated resources would help.

Holds within it the expertise to make that a reality.

Needs support to expand scope beyond individual institutions/domains.

*Increase the quality and availability of scholarship and resources about research impact.*

- 1** TOOLS/GUIDANCE: synthesize existing scholarly work to package evidence into easily applied and digestible tools for the research community to improve research impacts design and practice.
- 2** NEW RESEARCH: small-scale innovative scholarship that explores new horizons and advances knowledge about research impact practices.

***INDIVIDUAL or COLLABORATIVE***

## Infographic Tool

Ready to create a public engagement plan for your Broader Impacts? This infographic tool includes a fillable worksheet and a set of resources to support the development of a meaningful, community centered engagement project. (Bachleda 2019)

## Creating a Public Engagement Plan

An infographic tool to support the development of a meaningful, community centered engagement project.

Developed through a collaboration between the Institute for Learning & Brain Sciences at the University of Washington (I-LABS) and the Center for Advancing Research Impact in Society (ARIS).

### Introduction:

There are more opportunities than ever to engage in community focused work. But with so many options, how do researchers and organizations create a focused, meaningful plan?

This tool is designed as a quick-start framework to support the initial ideation and development of a project. The tool centers audiences' needs and the importance of building partnerships in project development. It also prompts the user to consider project logistics, build a logic model, and draft plans for sharing and receiving feedback about the work. An accompanying list highlights resources from across the broader impacts and public engagement communities.

### Sections:

Outlining Goals

Finding Inspiration

Understanding Audiences

Developing a Logic Model

Working in Community

Sharing & Feedback

### Three ideas for using this framework:

#### Brainstorm a Public Engagement Plan

Whether this is your first or your tenth public engagement project, a tool to help you think through the process of developing a community centered engagement project can be done as a team, or as an individual.

#### Inform a Broader Impacts Statement

Work through this framework to explore options and avenues for public engagement that can be incorporated into a broader impacts statement.

#### Support Professional Development

Use this tool in workshops, trainings, or one-on-one consultations to support researchers and organizations develop public engagement plans.

Amelia Bachleda

Institute for Learning and Brain Sciences, University of Washington

## Guidebook

Evaluating the Societal  
Impacts of Climate Change  
Research: A guidebook for  
natural and physical scientists

**Gigi Owen**

Climate Assessment for the Southwest  
University of Arizona

**Alison Meadow**

Climate Assessment for the Southwest  
University of Arizona

**Nalini Nadkarni**  
School of Biological Sciences,  
University of Utah

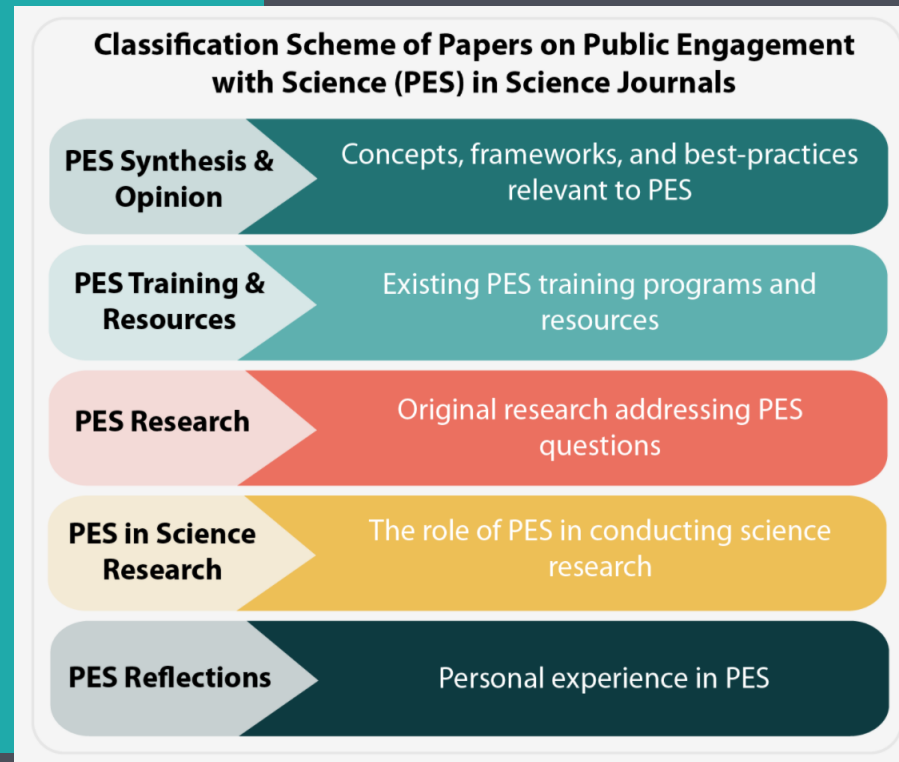

**Caitlin Weber**  
STEM Ambassadors Program,  
University of Utah

**Cathlyn Stylinski**  
University of Maryland  
Center for Environmental Science

## PES in Ecology Literature

A field review to understand how scientists communicate about their public engagement activities

## Eligibility

---

- ✓ Graduate Students
- ✓ University and College Professionals
- ✓ Academics, Scholars, Artists, etc.
- ✓ People who work for NGOs, industry, consulting LLCs. etc.
- ✓ Individuals from groups that are marginalized are encouraged to apply

*No applicant may propose work that is already within the scope of work of any existing grant-funded or contracted project*

- Strategies for designing meaningful research-impact activities that explicitly serve persons with disabilities.
- Strategies and best practices for creating research impacts through workforce development programs such as career and technical training and advanced technical training centers and institutes.
- Development of evidence- and critical theory-based resources that support young scientists and engineers who are Black, Indigenous, and/or Persons of Color in their pursuit of STEM careers.

- Strategies for designing meaningful research-impact activities that explicitly serve persons with disabilities.
- Strategies and best practices for creating research impacts through workforce development programs such as career and technical training and advanced technical training centers and institutes.
- Development of evidence- and critical theory-based resources that support young scientists and engineers who are Black, Indigenous, and/or Persons of Color in their pursuit of STEM careers.

- Due September 30, 2020.
- PDF up to 1400 words of proposal text (not including biosketches, figures, or references).
- Not a contract bid, put your best idea forward and be prepared to adapt it.
- Be clear about the intended contribution form and function.

- ARIS Scholarship Team Review (alignment)
- ARIS Community Review (quality and usability)
- ARIS Leadership Final Selection (cohort balance and timeliness)

## Fellowship Experience

---

- 6-7 Fellow peer-community meetings
- Giving and receiving thoughtful feedback and adapting your work accordingly
- Completing/submitting work in a timely manner
- Communicating with Julie and other members of the Scholarship Team
- Acknowledging peers, ARIS, and NSF as appropriate
- Sharing outcomes at ARIS Summit, on ARIS Website and with ARIS (online) Community
- Receiving recognition for your contribution and a built in audience

## Timeline and Important Dates

---

- **Applications due September 30, 2020**
- Fellows notified by December 1, 2020
- Fellows announced, fellows officially begin January 14, 2021
- Fellows meetings continue every other month March 2021 - March 2022
- First draft of product due July 1, 2021
- Internal feedback sessions complete by August 12, 2021
- Revised products submitted for external peer review October 14, 2021
- External review of products returned to Fellows November 19, 2021
- Revised products due January 8, 2022
- Presentation of fellowship products at ARIS Summit April (TBD) 2022
