

Stanford SeeME:

Student- driven outreach

within an R1 Institution

(Zach del Rosario @ NABI Summit 2019)

What is SeeME?

- **Student-driven outreach program**
 - **Flagship event**
 - **Bay Area Science Festival**
- **Student-driven training program**
 - **Pedagogical training to our teachers**
- **“Plug-in & Add-on” option for BI implementation**

What is SeeME?

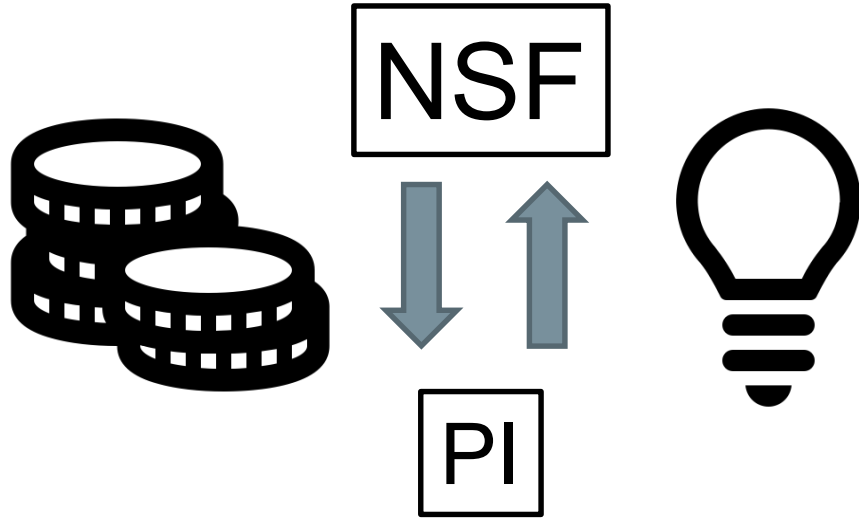

- **Student-driven outreach program**
 - **Flagship event**
 - **Bay Area Science Festival**
- **Student-driven training program**
 - **Pedagogical training to our teachers**
- **“Plug-in & Add-on” option for BI implementation**

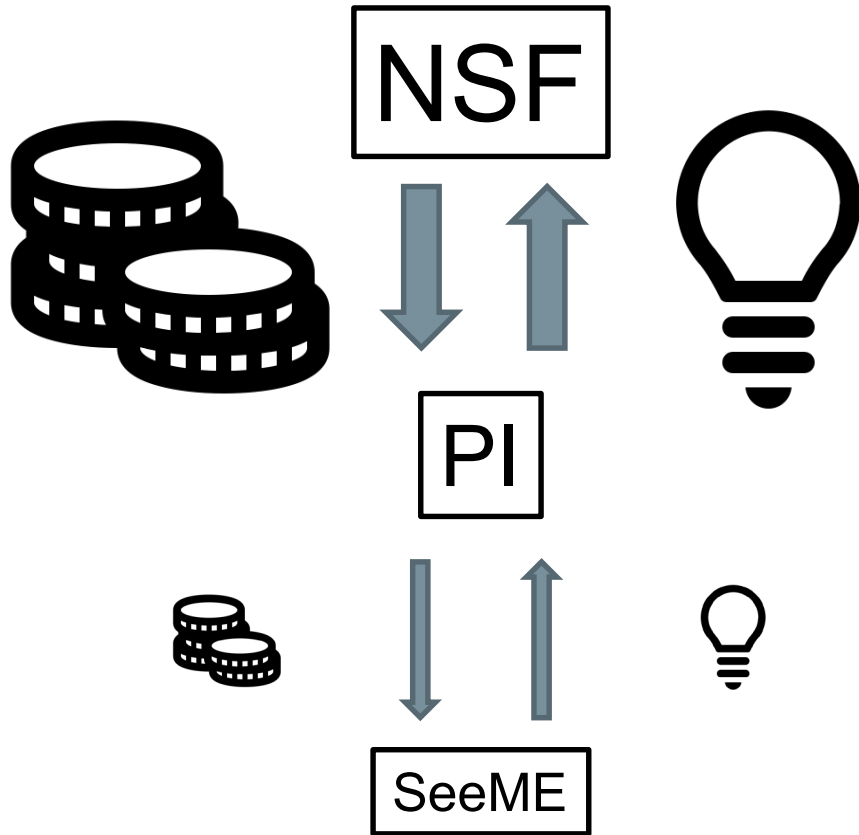

Unique at Stanford

Unique elsewhere?

Usual Schematic

Our Schematic

Our Schematic

Why SeeME?

- “Zach, you are *widening the gap*”
- **Graduate training**

Why SeeME?

- “Zach, you are *widening the gap*”

Do intentional outreach

- **Graduate training**

Equip our students

Our Guiding Principles

Why Am I Here?

- I *think* we know some stuff
 - **Claim: Students are an under-tapped resource**

- I know we need to learn more
 - **What are others doing?**
 - **Peer review!**

Student-driven outreach within an R1 Institution

- **Student-owned**
- **Student-run**
- **Student-serving**
- **Tailored to Stanford's value-structure**
- **Low-effort BI solution**
 - **“Plug-in & Add-on”**
 - **Broaden portfolio**

Student-Driven Program

- **PI “handed” us an outreach program**
- **PI believed in our ability to succeed**
- **PI *actively signaled it’s ok to work on this***

What Students Get

How do we get *grad students* to drive?

- **Free food**
- **Resume building; fancy titles**
- **Community building**

- **Our “secret sauce”**
- **Professional teaching consultant**
- **Workshops**
 - **Learning goals**
 - **5E Model**
- **Teacher socials**
 - **Hackathon model**
- **Dress rehearsal**

Learning Goals

- Participants will be able to define “learning goals”
- Participants will be able to articulate why learning goals are useful for effective pedagogy
- Participants will be able to distinguish between “technical” and “motivational” learning goals
- Participants will define at least one technical learning goal for their SeeME class
- Participants will define at least one motivational learning goal for their SeeME class

Content

- Example learning goals
 - Technical
 - Motivational
- SeeME program info
 - Logistics
 - Motivation

Activities

- Participant-generated learning goals (LBT)
- Participant-generated learning goals (Small-groups)
- Worksheet teardown (LBT)

Student-Driven Program

- **Students have ownership**
 - Program goals, design, implementation
- ***A missing component of PhD training***

Adding Value to an R1

**“This sounds great,
you have my support.”
Kenneth Goodson,
ME Department Chair**

- **What we never expected to hear!**

Why Our Department Likes Us

- **(We think)**
- **“Plug-in & Add-on”**
 - **Easy way to diversity one’s BI portfolio**
- **Partner, not a parasite**
 - **We write grants; bring in part of our budget**
 - **Written into proposals**

APRIL 30, 2018

Stanford graduate students teach local teenagers about engineering

Graduate students in mechanical engineering shared their engineering know-how and enthusiasm through a new program for local middle and high school students. The program's interactive classes exposed teenagers to the breadth of engineering.

[Stanford SeeME: Student-driven Outreach within an R1 Institution](#)

Presenter: Zachary del Rosario, Stanford University, Department of Mechanical Engineering

Conclusion

- **Institutional values**
 - Know them
 - Tailor
- **Students will pitch in**
 - Give affirmation
 - Give resources
- **Similar models?**
- **Measurement?**
 - Student outcomes
 - Teacher outcomes
- **Resources?**
 - Mine or yours!
