How to use the Produce Safety Templates

The Food Safety Modernization Act (FSMA) Produce Safety Rule (PSR) was created in an effort to assist the produce industry in developing a proactive approach to food safety. The focus of the Rule is to ensure safe produce in the marketplace. Along with implementing food safety practices, farms covered by the PSR will need to keep some records. The templates and additional items in this collection have been designed to assist Missouri produce growers in meeting the record keeping requirements of the PSR. A number of the record templates in this collection were adapted significantly from documents developed by Cornell University to help growers with Good Agricultural Practices (GAP) certification.

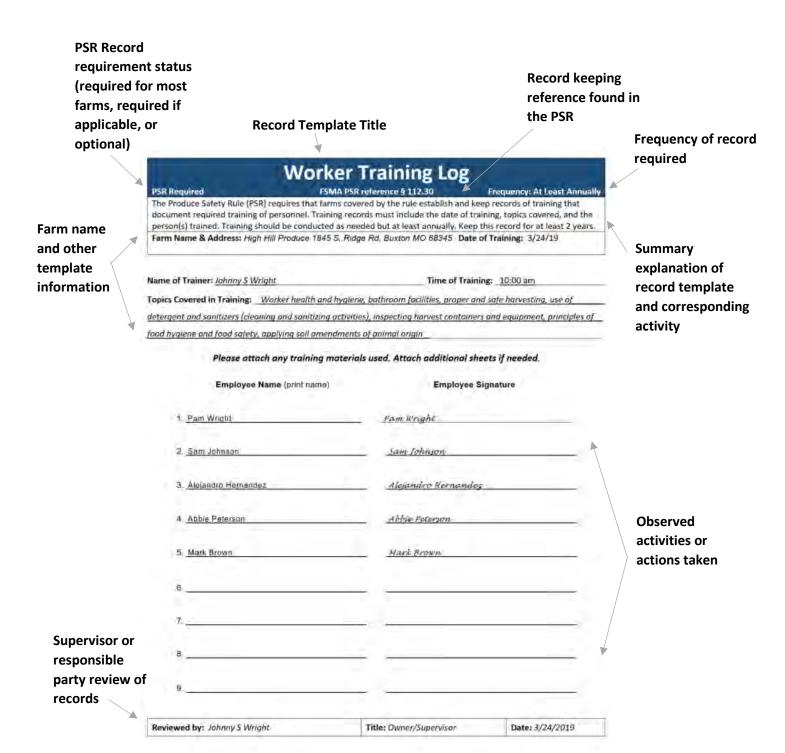

The records listed in the summary tables are categorized as "Farm Activity Records" and "Supporting Documentation Records". Farm activity records may include records that the farm completes, such as the annual water distribution system inspection. Supporting documentation records may include well water test results that the farm gets from the lab. Not all records listed in the two tables apply to all farms. The column on the left side of the table indicates whether the record is required for most farms, required if applicable, or optional.

With the following records, there are two copies of each: one copy is an example, and one copy is a blank template for farm use. The record header of each template indicates whether the record is required, references the section of the PSR that relates to the record, and the frequency of the record. Below each header is a brief explanation of the record, including record retention.

When completing the records required by the PSR, please be keep in mind:

- The retention time for most records is two years.
- Each record must be reviewed by an appropriate employee, such as a supervisor.
- Section 112.161 of the PSR requires that records be accurate and legible.
- Upon inspection or request by a regulating agency, a producer must be able to
 provide the records within 24 hours. Most farms will likely keep their records
 onsite but this timeframe allows for those farms that may keep records at another
 location.
- Farms are allowed to keep records in a format that they choose (electronic, hardcopy), as long as they meet the PSR requirements.

If you have any questions, please contact the Missouri Department of Agriculture Produce Safety Program at (573) 751-1134 or producesafety@mda.mo.gov.

Common Produce Safety Rule Acronyms

BSAAO - Biological Soil Amendments of Animal Origin

CFU - Colony Forming Units

FSMA - Food Safety Modernization Act

PSR - Produce Safety Rule

SOP – Standard Operating Procedure

Farm Activity Records

(templates provided)

	(templates provided)					
	RECORD TYPE	FREQUENCY	DESCRIPTION			
0 =	Worker Training	At least annually	As needed, but at least annually, personnel handling covered produce must be trained on food safety as it applies to their assigned duties. Must document topics covered and personnel trained.			
REQUIRED (most farms)	Water System Inspection	At least annually	As needed, but at least annually, the water distribution system under your control must be inspected for issues that may lead to contamination of water used in irrigation or other covered activities.			
REQ!	Cleaning & Sanitizing	As necessary	Equipment, containers, and tools used for covered activities (ex. harvesting, packing, and handling) of covered produce must be cleaned and sanitized as adequately necessary. Non-food contact surfaces of equipment and tools must be cleaned as necessary. Record of these activities must be kept. Farms should keep a copy of the label of sanitizer that is used.			
	Water Treatment Monitoring	As necessary	Covered farms must document results of water treatment monitoring outlined in Subpart E (Water) of the PSR.			
ABLE	Agriculture Water Die- off Corrective Action	As necessary	Covered farms using microbial die-off or removal rates on covered produce prior to harvest must document actions taken in accordance to 112.45 of the PSR.			
PPLIC/	Qualified Exemption Review	At least annually	Farms claiming a qualified exemption must complete an annual review of farm sales to ensure they meet the requirements for qualified exemption. Documentation of this review is required.			
REQUIRED IF APPLICABLE (some farms)	Commercial Processing Exemption – Disclosure Statement	With each shipment	Covered farms claiming a commercial processing exemption on applicable produce must provide the required disclosure statement that accompanies (e.g. Bill of lading, invoice, etc.) the produce shipment. A record of the disclosure statement must be kept.			
	Commercial Processing Exemption – Written Assurance	At least annually	Covered farms claiming a commercial processing exemption on applicable produce must receive an annual written assurance from the buyer in accordance to Subpart A (General Provisions) of the PSR.			
3 2	Compost Treatment	As necessary	Covered farms that produce treated biological soil amendments of animal origin must keep records to demonstrate the applicable process controls were met (e.g. time, temperature, etc.) in accordance to Subpart F (Soil Amendments) of the PSR.			
	Illness and Injury	As necessary	Covered farms may choose to record injury and illnesses of employees to better document potential sources of contamination.			
	Restroom Monitoring & Cleaning	As necessary	Covered farms may choose to record restroom monitoring and cleaning activities to ensure restrooms are properly cleaned, maintained, and stocked.			
OPTIONAL (not required by PSR)	Rodent & Pest Monitoring	As necessary	Covered farms may choose to record rodent and pest monitoring activities to better manage rodent and pest control. Covered farms must take appropriate steps to ensure pests and rodents don't contaminate produce.			
ON ired I	Soil Amendment Application	As necessary	Covered farms may choose to record when they apply soil amendments to covered produce to ensure proper application and time intervals are met.			
OPTIONAL trequired by	Visitor Log	As necessary	Covered farms may choose to record visitors that are at the farm. Covered farms must inform visitors of farm policies and procedures.			
(not	Wildlife & Domestic Animal Monitoring	As necessary	Covered farms must take actions reasonably necessary to ensure that wildlife and domesticated animals do not contaminate covered produce. Records may assist farms in managing animal activity.			
	Worker Training Checklist	As necessary	Covered farms are required to document annual training of workers who conduct covered activities. This checklist provides a list of key training topics to be addressed during the annual training. The checklist is not comprehensive and should include topics specific to your farm operation.			

Applicability of the above records depends on the farms operations. "Covered farms" refers to farms covered by the Produce Safety Rule as defined in Subpart A (General Provisions) of the Produce Safety Rule. Please see the Produce Safety Rule for full details regarding record keeping requirements.

Supporting Documentation Records

	RECORD TYPE	FREQUENCY	DESCRIPTION
REQUIRED IF APPLICABLE (some farms)	Qualified Exemption Sales Records	As necessary	Farms claiming a qualified exemption must keep records (e.g. Receipts, sales records) demonstrating the farm meets the eligibility requirements for a qualified exemption. Records the farm relies on for the 3-year period prior to the applicable calendar year must be kept.
	Water Test (Surface Water)	At least five (5) times annually	Covered farms with surface water (ponds, streams, etc.) subject to §112.44 of the PSR must be tested and documented at least five times annually after the initial water quality profile is established. Untreated surface water may not be used to wash hands or to clean food contact surfaces. Any water (surface, ground, etc.) used for growing activities of covered produce must have a Geometric Mean (GM) of 126 or less colony forming units (CFU) of generic E.coli per 100 mL of water and a Statistical Threshold Value (STV) of 410 or less of CFU of generic E.coli per 100 mL of water. Corrective actions outlined in the PSR may be used to meet these values.
	Water Test (Ground Water)	At least annually	Covered farms with ground water (wells) subject to §112.44 of the PSR must be tested and documented at least once annually after the initial water quality profile is established. Water used for washing hands, to clean food contact surfaces, and for use in harvest and post-harvest activities must have no detectable generic Escherichia coli (E. coli) in 100 milliliters.
ED IF APP some farms	Water Test (Public water)	At least annually	Covered farms using water from a public water system must annually obtain certificates of compliance or documentation of water test results.
JUIREI (se	Microbial Die-off Method – scientific data or information	As necessary	Covered farms using microbial die-off or removal rates on covered produce post-harvest in accordance §112.45(b)(1)(ii) of the PSR must keep scientific data or information used to support the microbial die-off or removal rates.
RE	Water Treatment Method – scientific data or information	As necessary	Covered farms treating water in accordance to Subpart E (Water) of the PSR must keep documentation of scientific data or information used to support the adequacy of water treatment method used.
	Alternative Water Treatment	As necessary	Covered farms that establish and use alternatives in accordance with §112.49 of the PSR must keep Scientific data or information to support the alternative.
	Alternative Analytical Methods	As necessary	Covered farms must document any analytical methods for water quality testing used in lieu of the method that is outlined in §112.151(a) of the PSR.
	Third Part Compost Treatment & Handling	As necessary	Farms using treated biological soil amendments of animal origin from a third party must keep documentation (e.g. Certificate of Conformance) that document it was adequately treated with appropriate process monitoring and handling.

Applicability of the above records depends on the farms operations. "Covered farms" refers to farms covered by the Produce Safety Rule as defined in Subpart A (General Provisions) of the Produce Safety Rule. Please see the Produce Safety Rule for full details regarding record keeping requirements.

Water Distribution System Inspection Log

PSR Required FSMA PSR reference § 112.50 Frequency: At least annually

The Produce Safety Rule (PSR) requires that farms covered by the rule inspect all agricultural water systems that are under the control of the farmer (including water sources, water distribution systems, facilities, and equipment), to identify conditions that are reasonably likely to introduce known or reasonably foreseeable hazards into or onto covered produce or food contact surfaces. See the Produce Safety Rule for full details on this inspection requirement. Keep this record 2 years past the date it was created. Farms will need to also consider the following:

- Nature of each water source (well, surface water, public water)
- Extent of control over each water source
- The Degree of protection of each water sources used (ex. barriers, fences, well houses, etc.)
- Use of adjacent and nearby land (ex. animal operations, run off, etc.)
- Use of water prior to your farm (ex. do other growers use water source prior to your farm).

Farm Name & Address: High Hill Produce 1845 S. Ridge Rd, Buxton MO 68345 Date of Inspection: 4/22/2019

Please refer to Subpart E of the Produce Safety Rule and your farm standard operating procedures for specifics on water distribution system inspections.

PLEASE ATTACH ADDITIONAL SHEETS IF REQUIRED.

Date	Time	Water Distribution System and/or Water Source	Observation	Corrective Actions Taken (if required)	Initials
4/22/19	7 AM	Well 1, north field	Well casing in good shape, backflow prevention device in place, no broken pipes. Well water tested annually (record kept on farm).	None	JSW
4/22/19	9 AM	Pond, south field	Significant geese presence around the south field pond.	Introduced decoys. Will monitor and test water.	JSW
4/22/19	9:30 AM	Pond, south field	Cattle field located downhill from south pond. No run off into the pond. Fence surrounds south field pond	Will monitor animal fencing.	JSW
4/22/19	11 AM	Pond, south field and well 1 north field	Pond used for produce drip irrigation (under plastic) and well for overhead irrigation are under control and accessible to supervisor	None	JSW
4/22/19	12 PM	Public Water	Obtained certificate of compliance from public water system. Public water used for harvest, cleaning and postharvest activities	Will obtain certificate of compliance annually. Will ensure no cross connections from untreated water made to public water source.	JSW

Qualified Exemption Review

PSR Required (if Applicable)

FSMA PSR Reference § 112.7

Frequency: Annual

Farms claiming a qualified exemption from the Produce Safety Rule (PSR) must complete and document an annual review of farm sales records to ensure they meet the criteria for a qualified exemption. The documentation of the annual review must be kept for two years. Records (such as receipts or other sales tracking records) for the three years prior to the applicable calendar year to support a qualified exemption must be kept.

Farm Name & Address: High Hill Produce 1845 S. Ridge Rd, Buxton MO 68345

Date of Review: Jan 1, 2019

STEP 1: Review food sales for previous three years. Food sales include produce sales, grain, feed for animals, sales of live food animals, and other human food.

Year 1 (Sales Year <u>2016</u>): \$ 30,000 Total Food Sales

Year 2 (Sales Year <u>2017</u>): \$ <u>55,000 Total Food Sales</u>

Year 3 (Sales Year <u>2018</u>): \$ <u>42,000 Total Food Sales</u>

Previous 3-Year Average Food Sales: \$ 42,333.33 (Part A)

**Food Sales Threshold Adjusted for Inflation: \$550,551 (Part B) -550,551 is the 3-year average for 2016-2018

** see information at the bottom of the page

Are the farms 3-year average food sales (Part A) less than the Food Sales Threshold Adjusted for Inflation (Part B)?

If yes, continue to STEP 2. If no, your farm does not meet the criteria for a qualified exemption.

STEP 2: Review food sales that were sold to qualified end-users (QEU). QEU are consumers of the food (sales directly to customers at a farmers market, U-Pick, Roadside stand, On-Farm store, CSA, other direct customer sales, or sales of food sold to an food retail establishment (grocery store) or restaurant that is in the same state of the farm or within 275 miles of the farm)

	Sales to QEU	Sales to non-QEU
Year 1 (Sales Year <u>2016</u>):	\$ <u>30,000</u>	\$
Year 2 (Sales Year <u>2017</u>):	\$ <u>40,000</u>	\$ <u>15,000</u>
Year 3 (Sales Year <u>2018</u>):	\$ <u>42,000</u>	\$
3-Year Average:	\$ <u>37,333</u> (Part C)	\$ <u>5,000</u> (Part D)

Comment: food sales from farmers market in 2016 & 2018. \$15,000 of grain sold to a broker at a grain elevator in 2017.

Is the 3-year average of sales to QEU (Part C) greater than the 3-year average of sales to non-QEU (Part D)? If you answered yes in STEP 1 and STEP 2, your farm meets the requirements for a qualified exemption.

**Adjustments for inflation: Food Sales Threshold Adjusted for Inflation is an average of the previous 3-year's inflation thresholds listed by FDA. Visit FDA's website at https://www.fda.gov/Food/GuidanceRegulation/FSMA/ucm554484.htm to view the table of these values. You may also contact the Missouri Department of Agriculture Produce Safety Program at (573) 751-1134 for assistance in determining the correct value.

Worker Training Checklist

The Produce Safety Rule (PSR) requires that employees (including part-time, seasonal, volunteers, & supervisors) who handle (or supervise others who handle) covered produce or food-contact surfaces must be adequately trained as needed, but at least once annually. Training must also be given in a manner that the worker understands. At least one supervisor or responsible party on the farm must complete the standardized Produce Safety Grower training course. It is important to recognize that farms vary greatly in their operation and training topics must cover food safety as it relates to the farm's specific operations. Farms must develop a training that is specific and applicable to their operation, which include the required training topics outlined in the PSR. This table is an aid to help farmers identify key training requirements and should NOT be used as a comprehensive training topic list.

Applicabilit	y Topic	Description	Completed? (Check box)		
	Principles of Food Safe	ety & Food Hygiene	· ·		
æ æ	Microbial Contamination	Workers need to be trained to identify sources and routes that could lead to produce or food contact surfaces becoming contaminated.			
harves	Cleaning & Sanitizing	Workers need to be trained on the difference between cleaning & sanitizing and know the steps to properly conduct these activities.			
who	Working Animals & Wildlife	Workers need to be trained on the potential risks of microbial contamination caused by wildlife or by working animals.			
those 3	Additional Farm Specific:	Description:			
S anding	Personal Health & Hyg	iene			
Required for <u>ALL</u> Workers	Recognizing Health Conditions / Sick Policy	Workers must be able to recognize symptoms of health conditions that may lead to contamination of food contact surfaces or produce. Workers must be trained on who to report to in cases of injury or illness.			
r ALL V	Injury Policy	Workers must know how to properly handle incidents when bodily fluids are present and could potentially contaminate covered. Employees should be trained on where to receive or access first aid.			
d fo	Hand Washing	Workers must know when and how to properly wash hands. 112.32 of the Produce Safety Rule outlines when hand washing is required.			
uire o hanc	Restroom	Workers need to be made aware of restroom locations and proper hygiene associated to reduce potential of cross-contamination.			
Req	Additional Farm Specific:	Description:			
orke	Produce Safety Rule Standards				
Required for <u>ALL</u> Workers (Required for <u>ALL</u> workers	Applicable Standards found in the PSR	Workers must understand the standards found in Subparts C (Worker Training) through Subpart O (Records) of the PSR which apply to their job tasks. For example, workers who clean and sanitize the pack line will need to be trained on the requirements of the rule which apply to this activity (i.e. Subpart L – Equipment, tools, buildings, and sanitation). Workers need to understand the terms "covered produce" and "covered activities".			
	Additional Farm Specific:	Description:			
	Employees Engaged in	Harvest Activities of Covered Produce			
for irkers	Proper & Safe Harvest	Workers conducting harvest activities must be trained to recognize produce that must not be harvested, including produce that has been contaminated or likely to be contaminated.			
Required fo	Inspecting Harvest Containers and Equipment	Workers who conduct harvest activities must know how to inspect harvest containers and equipment to ensure that they are functioning properly, clean, and maintained so as not to become a source of contamination of covered produce with known or reasonably foreseeable hazards			
R	Correcting Harvest Containers & Equipment	Workers who conduct harvest activities must know how to correct problems with harvest containers or equipment, or know to report such problems to the supervisor, as appropriate to the person's job responsibilities.
