

General Information for the MU Integrated STEM Internship Program

Coordinated by University of Missouri Extension and Engagement, the MU ISIP program will host 5 Missouri students from various institutions. Interns will participate in on-campus research alongside an Extension faculty member and practical application of research around the state of Missouri alongside a regional Extension faculty member. Interns will also participate as a cohort in Leadership Online for Today; a virtual leadership program designed to enhance leadership skills. They will be coached through this experience by a University of Missouri Extension and Engagement faculty member with expertise in the field of leadership.

This internship runs from May 30, 2023–July 28, 2023. It will start and conclude in Columbia, Missouri at the University of Missouri campus. Interns will spend four weeks of the internship working with a regional Extension faculty member, so they may be living elsewhere during that time. Students will receive \$500 per week (\$4500), plus travel expenses, campus parking, and a stipend for housing and food. Interns may choose to be housed in dormitories on the MU campus or can live off campus if they prefer.

Eligibility

Applicants must have completed at least one year of full-time college enrollment (but not more than two years) prior to June 2023. Students should be pursuing a major or minor in fields related to the area in which they are applying. Students must be citizens or permanent residents of the U.S.

Application Information

The deadline to apply is March 15, 2023. Students must complete the attached application form and provide: a). one letter of recommendation; b). a resume (one page limit); c). an unofficial college transcript. Completed application packets should be saved as a pdf combined into one document and emailed to Rebecca Mott at mottr@missouri.edu.
