

Integrated Pest Management

MANAGEMENT OF SOFT RED WINTER WHEAT

Plant Protection Programs

*College of Agriculture, Food
and Natural Resources*

Published by MU Extension, University of Missouri-Columbia

\$3.00

IPM1022

This publication is part of a series of IPM Manuals prepared by the Plant Protection Programs of the University of Missouri. Topics covered in the series include an introduction to scouting, weed identification and management, plant diseases, and insects of field and horticultural crops. These IPM Manuals are available from MU Extension at the following address:

Extension Publications
2800 Maguire Blvd.
Columbia, MO 65211
1-800-292-0969

Authors

Shawn Conley, Agronomy
 Wayne Bailey, Entomology
 William Casady, Agricultural Engineering
 Fred Fishel, Agronomy
 Bill Johnson, Agronomy
 Ray Massey, Agricultural Economics
 Peter Scharf, Agronomy
 Reid Smeda, Agronomy
 Laura Sweets, Plant Microbiology and Pathology
 Allen Wrather, Plant Microbiology and Pathology

University of Missouri, Columbia

Note: Bill Johnson's current affiliation is the Department of Botany and Plant Pathology, Purdue University

CONTENTS

Introduction to wheat management 3

Fertility management 7

Weed management 11
 Weed identification 15

Wheat diseases and their management . . . 17

Insect pests of Missouri wheat 27

Wheat harvest, drying and storage 33

Wheat economics 38

Appendix: Aphids in Missouri wheat 41

Soft red winter wheat integrated crop and pest management schedule 42

Table 1. Soft red winter wheat crop-growth stages 4

Table 2. Wheat seeding rate in pounds per acre based on thousand kernel weight . . 6

Table 3. Percent crop yield loss associated with common winter annual weeds in Missouri 11

Table 4. Weeds with known herbicide-resistant populations in wheat-producing adjacent states 14

Table 5. Minimum recommended airflow rates for drying wheat with natural air 35

Table 6. Equilibrium moisture content for soft red winter wheat 36

Table 7. Budget for wheat and double-crop soybean production 40
