

Missouri Steer Feedout Program 2025-2026

Prove the feedlot and carcass performance of your genetics

Program Goals

- Evaluate steer genetics and management on feedlot performance and carcass characteristics
- Gain experience in feeding cattle and retaining ownership without the investment and risk of feeding an entire pen of cattle
- Use the results of the program to market cattle in other sectors of the industry

This program will allow cow-calf producers to achieve these goals by custom feeding/finishing steer calves at the Show Me Youth Academy Feedyard near Newport, MO which is NE of Lamar, MO. Minimum feeding enrollment group is 5 steers/farm and enrollment deadline is October 15th.

For more information on steer enrollment and program requirements contact Patrick Davis MU Extension Livestock Field Specialist at (417) 276-3313 or by email at davismp@missouri.edu
